

# UVC STET CUBE

WSS UVC STET CUBE

 **MADE IN ITALY**

## A desktop device for stethoscope disinfection

- Stet Cube® can be used with almost all stethoscopes.
- This device is specifically designed to ensure security and deep hygiene for patients, thanks to the action of UVC LED that helps keep the stethoscope clean.
- Stet Cube is designed as a small cubic box and is an innovative and practical device, ideally suited for all healthcare professionals using a stethoscope.
- A light weight and compact device, it is ideal for use on doctors' desks, in the hospital carts or mounted on walls using special custom built bracket.
- Dual control system consisting of an optical sensor and a mechanical one allows for operational flexibility.
- Built-in microprocessor for irradiation and security controls.
- Aesthetically designed casing using a special shiny polycarbonate.
- Compatible with stethoscopes of all sizes (paediatric, neonatal, cardiac etc.).
