

AIRCLEAN UVGI

WSS AUVGI

Benefits

- Disinfects 24 hours a day
 - Plug and Play
 - Maintenance-free
 - Eliminates the need for expensive cleaners
 - Excellent price / benefit ratio
 - Simple to retrofit
 - Easy installation and exceptional fast performance.
 - The AirClean UVGI unit has a coverage of up to 100m2**.
- (**actual room dimensions, layout etc. are needed to calculate the exact requirement)

- The **AirClean UVGI** is a “Plug and Play” unit, specifically designed to disinfect the air in confined spaces. The unit can be used in a wide array of locations ranging from hospital rooms and wards, operation theatres, elevators, lobbies, waiting rooms to retail outlets, food production/preparation areas and storage facilities.
- The high intensity UVC lamps can effectively eliminate over 99.9% of airborne microbes such as viruses, bacteria, spores and moulds.
- Safety**
The unit does not produce ozone and the light guards prevent the UV-C light from escaping. This makes the AirClean UVGI safe to use in the presence of people. Special Teflon sheath** can be provided as an add on safety feature for the UVC emitters to protect against breakage.

Type	Airclean Purifier
Dimensions	192 x 228 x 740mm
Weight	7 Kg
Supply	230v / 50Hz
Power consumption	240W
UV-C emitter	2 x 95W with optional Teflon coating
UV-C emitter life	9,000hrs
Material	Grade 304 stainless steel
Air flow	120m3/hr
Remote control	No
Accessories	Teflon coated lamps for food safety applications. Ozonating lamps.
Price	12,990.00 AED
