

# UVC STET CUBE

WSS UVC STET CUBE

 **MADE IN ITALY**

## A desktop device for stethoscope disinfection

- Stet Cube® can be used with almost all stethoscopes.
- This device is specifically designed to provide safety and reassurance for patients, thanks to the action of an UVC LED that keeps the stethoscope sterilized.
- Stet Cube is an innovative and practical device, ideally suited for all healthcare professionals using a stethoscope.
- As a light weight and compact device, it is ideal for use on doctors' desks, on hospital carts or mounted on walls using a special custom built bracket.
- Dual control system consisting of an optical and a mechanical sensor allowing for operational flexibility.
- Built-in microprocessor for irradiation security control.
- Aesthetically designed casing made of a specially engineered polycarbonate.
- Compatible with stethoscopes of all sizes. (paediatric, neonatal, cardiac etc.)

Type	Medical/ Stethoscope
Remote Control	No
Price	<b>AED 995.00</b>
